The Elektro-Optika Ltd. has been formed in the year of 1993.

Our outline is to **service and repair** microscopes, colposcopes and any type of optical instruments in universities, hospitals, health headquarters. Our job is based on our 43 years experience, and on our partnerships.

The company is working with eight people 2 from these people are always going around the country working.

In 1997 we decided to sell optical instruments as well.

The instruments distributed by us:

- Biological, scientific, inverse, polarization, phasecontrast, darkfield, fluorescens microscopes
- Gynecological colposcopes
- ENT instruments, operation microscopes
- Ophthalmological instruments,
- Dioptria measurement instruments
- Refractometers used by light industry, or food industry.

We are also have digital picture analyzing software. We can offer wide range of digital photcameras, attached to microscopes.

For us to give the best quality to our customers, as from the year of 2000, we are joining the European Union Quality Insuring system, the DIN EN ISO 9001:2008.
