SWAT PRIVAT GROUP

GUARDING YOUR SECURITY

SWAT Privat Group Kft. [SWAT Privat Group Ltd.] was established in 2011 to provide debt collection services, property dispute resolution services, shipment escorting and other security services as well as private investigation services to help enterprises and private persons all over the country with a firm hand in solving their problems.

OUR BUSINESS PHILOSOPHY

is based on lawfulness, reliability and success.

We pursue our activities and solve problems for our clients in accord with legal regulations and by considering our clients' interest and confidentiality to the greatest extent at all times.

Since we are fully aware that their own matters are the most important to everyone, we proceed as thoroughly in smaller and apparently simpler matters as in assignments of a larger value.

We apply strict criteria when selecting new employees. As a result, the tasks assigned to us are completed by efficient and reliable experts with the greatest confidentiality ever possible. We adapt our appearance to the nature of the given assignment.

Our private investigation department is headed by the former head of the Department for Organised Crime who has a professional record of more than 20 years, and our staff includes several former detective chief inspectors at the police with many years of experience in the fields of homicide and organised crime.

By our experience, there are no untraceable debtors, no debt claims that cannot be fulfilled and no security tasks that cannot be accomplished – and this is proven by the several hundred tasks assigned to us that we have solved until now.

We hope that as a principal you, too, will soon have the opportunity to experience this for yourself when we fully meet all your expectations.

DEBT COLLECTION

**for enterprises and private persons
– with an efficiency of 80 %**

Unfortunately, as a result of economic conditions outstanding amounts and go-round debts have become more common in recent years.

In all steps of enforcing debt claims from consultancy and court proceedings through to execution we use methods tailored to the specific needs of the individual client, including approaching debtors personally in order to complete assignments as quickly as possible, conforming to legal regulations at all times.

We are proud of the fact that in 80 % of our debt collection cases we have managed to enforce our clients' debt claims without court proceedings.

RESOLVING PROPERTY DISPUTES

lawfulness and strength working hand in hand

To non-professionals, property disputes, arbitrary occupation and the machinations of the "housing mafia" seem to be insoluble problems, while they can in fact be handled effectively.

In all cases of this kind, our legal experts and private detectives use instruments that do not cause any disadvantage to our clients when their debt claims are enforced. Even in the most delicate and most complicated legal situations we achieve the protection of our principals' possession by professional means, efficiently and quickly.

SHIPMENT ESCORTING

safety in transit even for great values

SWAT Privat Group Kft. provides armed escorting for shipments of great value or great risk with specialised staff, equipment and two escort cars to ensure that your merchandise reaches its destination safely. On the controlled and documented route, we prevent and parry off contingent attacks.

Other services
